The MVA can increase, decrease or have no effect on the amount deducted from the contract value to satisfy a withdrawal request, based on changes in market interest rates between the contract issue date and the withdrawal date. Tax-deferred growth <sup>3</sup>	<p>Your money grows tax-deferred with a fixed annuity. This means earnings from your annuity are not taxed until they are withdrawn. You also benefit from compounded growth, allowing you to earn interest on your contributions and interest on earnings you have already accumulated.</p>																																								

**This is a summary of product features. Please consult the contract for a complete explanation of benefits, limitations and exclusions.**

<sup>1</sup>Withdrawals reduce the annuity's remaining death benefit, contract value, cash surrender value and future earnings. Withdrawals may be subject to income tax and, if taken prior to age 59½, an additional 10% IRS tax penalty may apply. More frequent withdrawals may reduce earnings more than annual withdrawals.

<sup>2</sup>The healthcare waiver of withdrawal charges may not be available in all states, and state variations may apply.

<sup>3</sup>An annuity contract may be purchased on a non-qualified basis or for use within certain qualified retirement plans. Tax deferral provides no additional value when an annuity is used to fund a qualified plan, such as an IRA. An annuity contract, however, does provide a number of other benefits and features not provided by such retirement plans or arrangements alone.
