One size doesn't fit all when it comes to underwriting.

Using advanced analytics, we can streamline the underwriting experience for eligible applicants based on their individual circumstances.

Applicants who apply for fully-underwritten term, universal life, and variable universal life products may qualify for accelerated underwriting. Contact your Protective representative for a complete list of eligible products.

For Financial Professional Use Only. Not for Use With Consumers.

Key benefits of accelerated underwriting:

-  Fluids and APSs may not be required
-  Application Part II can be completed by phone with a Protective employee during business hours or online 24/7
-  Some decisions available with Instant Issue
-  All cases facilitated via Protective's automated underwriting platform to optimize speed to issue

How our process works:

- To process the application for accelerated underwriting consideration, a completed Protective application Part II is required. Applicants can complete this online or elect to complete the interview over the phone.
- We'll gather the required data and review the application disclosures that will be used to determine the underwriting requirements and the best available class for the applicant.
- Application package sent out for signature.
- At the end of the application process, you can expect your applicant to follow one of these two paths:

Accelerated underwriting: The need for an exam and labs is eliminated; however, medical records may be required for certain medical history to ensure accurate underwriting.

Traditional underwriting: Exam, fluids, labs and/or medical records are required to ensure accurate underwriting.

Some applicants may appear to be eligible for an accelerated underwriting offer, but still will be required to complete the exam and labs. The need for exam and labs could be from the underwriting data gathered (for example, prescription drug reports), a disclosure by the applicant, or a combination of factors. Even if your applicant does not get an accelerated underwriting offer, they could still qualify for the best class through exam and labs underwriting.

Accelerated underwriting cases will be monitored post-issue to confirm the disclosures provided by the applicant. Information gathered via accelerated underwriting cases may be reviewed and addressed with your applicant if we discover any material differences.

The checklist below will help you determine if your applicant may qualify for accelerated underwriting, possibly eliminating the need for fluids and APSs.

Enhanced underwriting guidelines for lower face amounts and younger ages.

Different accelerated underwriting guidelines may apply for policies with a face amount of \$1 million and under for applicants age 18-50.

These underwriting guidelines are designed to promote greater throughput and Velocity Instant Issue rates for this population. Ratings for specific medical impairments may be different under these guidelines when compared to fully underwritten guidelines to achieve these goals.

Available risk classes: Select Preferred, Preferred, Standard Non-Tobacco, Table 2 Non-Tobacco, or up to \$5 Flat Extra.

Let's work together for better protection and simpler solutions.

We're Protective

Protective provides protection that fits your life, because we believe everyone deserves a sense of security and protection. We've been protecting people for over 115 years, delivering on our promises and pushing to do more for more people.

Because we're all protectors.

Applicants who do not fit all eligibility requirements may need to submit additional information like a paramedical exam, or other labs or medical records.
